

Our Value

With a presence in several African ports, Oilibya offers products and services for the shipping industry. Different types of lubricants specially produced for marine use are available to meet the needs in this sector.

The Oilibya products and services available for the shipping industry are extensive and range from small local fishing vessels to large international cargoes travelling all over the world.

In Africa Oilibya is a leader in providing fuel and lubricants to the shipping industry coupled with a high quality service.

Our Mission

Market premium quality lubricants which endure rigorous applications, harsh environmental conditions and are often recommended for use in the most severe and demanding applications in many sectors where lubrication is key. Our products provide outstanding fuel economy, engine efficiency and possess excellent compatibility characteristics. Our commitment is to be fully in line with Libya Oil's sales engineering services (SES) offering as undertaken throughout the group's affiliates and to offer our customers key programs aimed at lowering the cost of lubrication and maintenance.

Products & Services

Oilibya offer a wide range of marine engine oils, system, cylinder and crankcase lubricants for use in highly rated high, medium and slow speed engines using residual fuels and distillate Fuels. They have a wide range designed for various fuel types including engines using fuels of High sulphur content. Marine engine oils are blended with select high viscosity base Oils and A unique additive technology to achieve outstanding performance in strenuous applications.

Reliable Service & Delivery

We are not only understand your need for good service, but we also understand that you need a partner that you can trust and reliable for product availability, on-time delivery, competitive pricing, as well as being responsive to the market dynamic. Therefore, we are in-tune with your need to run efficient business.

Oil analysis program that allows the follow up of lubricants in use, through elaborate oil sample analysis whose results can be availed in a short period using our well equipped Laboratory in our blending plant (OPSBA) dedicated exclusively for used oil analysis.

Marine Engine Lubricants

Industrial	Application & Fuel type	SAE Grade	TBN	API Rating	PDS
High Speed Engines					
Marinegard DHS	High Speed Diesel Powered Marine Engine	15W-40	11	API CI-4/SL ACEA E5,E7, B4, CF	More about this link
Marinegard 312	Marine Diesel Oil - Marine Gear Oil Trunk Engine	30	15	CF	More about this link
Marinegard 412	Marine Diesel Oil - Marine Gear Oil Trunk Engine	40	15	CF	More about this link
Medium Speed Engines					
Marinegard 330	Medium Sulfur Fuel Trunk Engine	30	30	CF	More about this link
Marinegard 340	Medium Sulfur Fuel Trunk Engine	30	40	CF	More about this link
Marinegard 430	Medium-speed trunk piston, high Sulfur Fuel Trunk Engine	40	30	CF	More about this link
Marinegard 440	Medium-speed trunk piston, high Sulfur Fuel Trunk Engine	40	40	CF	More about this link
Low Speed Engines					
Marinegard 570	Crosshead Diesel Engine Oil - Cylinder, low speed operating on residual fuel with sulfur content higher than 1.5%	50	70	CF	More about this link

Technical Services Management

Our value towards clients comprises of application consultancy, technical support, Trainings, condition monitoring, used oil analysis and provide optimal lubricant solutions that create value added benefits to our customers business at quality and service levels that are aligned completely with their expectations. These are delivered by our team of highly experienced and certified lubrication specialists.

Our experienced engineers can work with you to understand your fleet's particular lubricants needs and recommend a programs to meet your specific goals and objectives.
